** Prepared by the Drafting Board on the Standardization of Geographical Names, Bucharest.

SUMMARY

The work on standardization of geographical names has, particularly in recent years, been done in close conjunction with mapping activities. In 1991 a new edition of the topographical map of Romania was completed. At the same time a toponymic file of the basic map (1:25,000) was made. The geographical names were standardized in accordance with the National Toponymic Guide for Maps and Other Cartographic Documents prepared by a group of specialists that included linguists, geographers and cartographers.
